GK Mechanical Systems, LLC

934 B Federal Rd.
Brookfield, CT. 06804
Attn: Mike Sleet

Dear Mike,

This letter is a direct recommendation for GK Mechanical Systems' Quality and Delivery. GK Mechanical Systems has provided production parts, spares and also a field repair kit in support of the Longbow FCR program since 2004.

It has been a pleasure working with GK Mechanical Systems for nearly a decade now. Their professionalism, engineering and manufacturing knowledge have been apparent throughout our business relationship.

The GK Mechanical Systems provided components, Titanium Quick Receiver Assembly and attaching Nut, were added as second sources on a Lockheed Martin sole source drawing in 2004. GK Mechanical Systems immediately became the preferred source.

From the first contract in 2004 through today, GK Mechanical Systems has maintained 100% QUALITY and 100% DELIVERY. This includes 567 Titanium Quick Receiver Assemblies and 596 attaching Nuts spread across 23 Contract Line Items.

Respectfully,

A handwritten signature in black ink, appearing to read "Pat Jackson".
